# QUARTERMASTER

Create your own coin-operated USB kiosk

Simply plug a keyboard into the Quartermaster
and connect the USB cable to the computer.
Presto, instant computer kiosk!

No software required!

Compatible with any
operating system:
Windows, Mac, or Linux.

Can be used with any game
console equipped with USB
controllers.

Control any USB peripheral!

QUARTERMASTER

Create your own coin-operated USB kiosk

Vend time to any device that uses a USB connection:

Connect keyboard and mouse to control computer input

Hook up a printer or scanner as premium kiosk features

Timed access to data stored on external drive

Instant arcade with game controller

Even less common peripherals such as microscopes, lights, fans, or beverage warmers can be managed

Need to control more than two USB devices at once? Attach a hub!
